Cancún –Riviera Maya, México

Riviera Maya has an extension of 86 miles (120 km), and it is located in Quintana Roo state, on the northeast coast of the Yucatan Peninsula, in Mexico. The history of the northern region of the Yucatan Peninsula is that of the fascinating Mundo Maya. The Mayan Civilization was the birthplace of astronomy and agriculture's great discoveries and technological advances. Mayan architecture astonishes with its excellent combination with the jungle's exuberance.

On the Route of the Maya Charm, you will discover a large number of activities. Hidden among the dense rain forest stands the ancient city of Coba, in these ruins you will find the tallest pyramid. Tulum was a city in the middle of a lush tropical jungle, an archeological site built over a cliff with the turquoise waters as background.

The authenticity of the Riviera Maya's people is an excellent and powerful window into the past.

SLAP 2016 – Symposia

- Nanotechnology and Polymers
- Polymers and the environment
- Polymer for tissue engineering and biomaterials
- Stimuli-responsive polymers for medicine
- Polymer composites and nanocomposites
- Polymer engineering, processing and rheology
- Polymeric membranes and their applications
- Modern synthetic methods of polymers
- Modern methods of analysis and characterization of polymers and theoretical studies
- General topics on polymers

SOCIEDAD POLIMERICA DE MÉXICO

The Sociedad Polimérica de México (SPM) welcomes you to the XV Simposio Latinoamericano de Polimeros (SLAP), the XIII Congreso Iberoamericano de Polímeros and the XXIX Congreso Nacional de Polímeros.

This meeting will gather research professionals and students from Latin America, Spain and Portugal presenting their recent scientific and technological advances in polymer science. Sponsors from industry and companies related to polymer characterization will also participate.

Ángel Licea Claverie
President, SPM
